## VOICE BUSINESS SERVICES

### LEVERAGE THE CLOUD FOR YOUR BUSINESS VOICE

The Centuric cloud-based VoIP phone system is an all-inclusive unified communication (UC) solution designed for small to large enterprises.

#### HOSTED PBX & VOIP

Reliable, high-quality phone system that simply works. Need a solution that can grow at the same rate as your business? With Hosted PBX & VoIP by Centuric, you have the ability to increase productivity without the need to purchase an expensive, complex, depreciating phone system.

#### VIRTUAL AUTO ATTENDANT

More and more companies have remote offices and mobile workers. Many users have laptops and smart phones, and are constantly mobile. They need to stay in touch with their customers, colleagues, and supply chain vendors. Centuric Voice is a perfect scenario for a Virtual Auto Attendant or a Mobile VoIP solution.

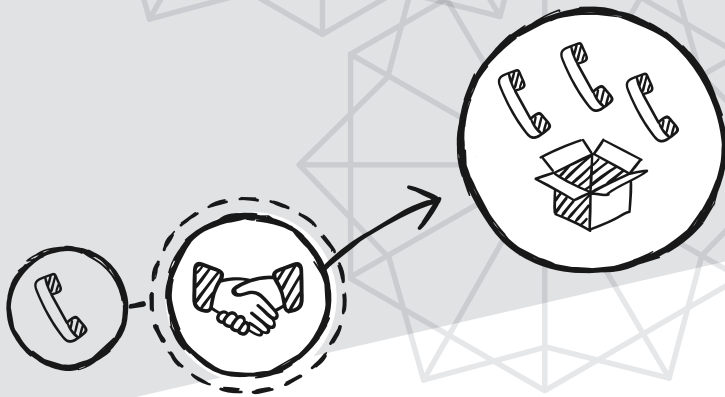

#### UNIFIED COMMUNICATIONS

Unified Communications (UC) can be defined as the seamless integration of voice, presence, chat, data, applications, and other technologies to improve communications, processes, and business productivity. Centuric's cloud software and services deliver the value of UC to your business.

#### SIP-TRUNKING

Standard and Enhanced SIP Trunking. Routing calls to an Auto Attendant, other SIP trunks (at other locations), voicemail, or a Find-Me, Follow-Me sequence. This disaster recovery feature is extremely powerful and flexible.
